## POLICY STATEMENT FOR ENERGY CONSUMPTION

Regional Institute of Education, Mysore recognizes the importance of energy conservation and sustainability in reducing the environmental impact and operating costs. Therefore, the Institute is committed to adopt energy-efficient practices and technologies to minimize the energy consumption while maintaining a safe and comfortable learning environment for the students and staff

Towards achieving this goal, we will:

- Promote awareness and education on energy conservation among staff and students through regular training and communication.
- Implement energy-efficient technologies and practices, such as LED lighting, energy-efficient HVAC systems, and smart building automation systems, wherever feasible.
- Encourage the use of renewable energy sources, such as solar panels, wherever feasible and cost-effective.
- Develop and implement an energy management plan to monitor and track energy usage and identify opportunities for improvement.
- Set energy consumption targets and regularly review progress towards achieving them.
- Consider the environmental impact of energy consumption when making decisions on campus operations, such as procurement and construction.
- Plan to conduct regular energy audits to identify areas of energy wastage and develop plans to address them.

By following these policies, we aim to reduce our energy consumption and associated costs while also contributing to a sustainable future.
